Make a dramatic statement with this impressive antique wall bracket console from Italy. Crafted circa 1760, the substantial piece is richly hand carved in the Baroque manner, featuring bold scrolling volutes, layered acanthus leaves, and deeply molded architectural detailing. The sculptural form projects confidently from the wall, creating an elegant platform for displaying a bust, urn, religious figure, or treasured decorative object.
The rectangular top retains its original wood surface with centuries of authentic wear, adding character and historical depth to the piece. Beneath, the monumental corbel is carved with robust foliate motifs and scrolling elements that showcase the craftsmanship and grandeur associated with Italian decorative arts of the period. Traces of the original gold leaf finish remain throughout, now mellowed by age into a beautifully patinated surface with warm bronze and gilt tones.
This antique wall console is in excellent condition commensurate with age and use, and retains remarkable visual presence from every angle. Whether placed in an entryway, stair hall, library, or formal living room, it serves as both a functional display shelf and a striking work of architectural sculpture.
Dimensions: 22.25”W x 11.5”D x 26”H.
