Crafted in France circa 1880, this elegant antique table lamp features a slender Neoclassical column decorated with intricate black Chinoiserie-inspired pastoral scenes over a rich coral-red lacquered ground. The refined silhouette combines classical architectural elements with the exotic decorative influences fashionable during the Napoleon III period.

The tall cylindrical column rises from a molded circular collar resting on a substantial square pedestal base with gracefully flared sides. The lacquered surface is embellished with delicate black scenic decorations depicting figures in period costumes, horseback riders, architectural elements, trees, and pastoral landscapes. Additional floral and foliate motifs enhance the composition, while contrasting black borders outline the architectural contours of the base. The vivid red lacquer finish has developed a warm, gently aged patina, beautifully complementing the detailed black illustrations.

The antique Napoleon III style lamp has been newly wired to US standards and fitted with a brass socket, harp, and gold-colored electrical cord. The fixture accommodates one light bulb and is in excellent condition commensurate with age and use, retaining its rich lacquered finish with minor surface wear consistent with its age.

With its elegant proportions and distinctive coloration, this decorative lamp would make a sophisticated addition to a living room, bedroom, library, or study, displayed on a side table, desk, or console.

Shade not included.
