Bring the outdoors in with this large, elegant, antique birdcage. Crafted in France, circa 1880, this The birdcage features an elegant, domed design with intricate metalwork. The curved roof is topped with a decorative gold finial, adding a touch of sophistication. The metal bars, aged with a charming patina, are closely spaced and meticulously crafted, reflecting the attention to detail typical of late 19th century craftsmanship. The cage includes a small, secure door at the front, likely used for access. Its size and ornate structure suggest it was both a functional piece and a decorative object, intended to house a bird while serving as an aesthetic focal point in a well-appointed room. The bird cage is in very good condition commensurate with age and use, and adorns its original black patinated finish. Measure: 21.5" W x 14" D x 36" H.
