Categories: [New Arrivals](#), [Wall Decor](#)

Decorate a entry wall or hallway with this elegant antique ceramic fountain. Crafted in Rouen, France, circa 1890, the decorative three-piece set is complete with basin, reservoir with metal spout, and wooden stand. The faience lavabo, is hand painted with floral and foliage decor in a Classic white, blue, red and yellow palette. The floral design includes a basket of flowers on the front of the reservoir. The Normandy fountain is in excellent condition with rich colors, and would be a charming addition to any room. The basin could also be used as a planter to hold herbs or flowers. The wash basin or lavabo was a typical piece found in French homes before running water was available. It consists normally of an ewer or container of some kind to pour water, and a bowl to catch the water as it falls off the hands. 14"W x 8.25"D x 39"H
