This elegant antique Majolica vase was sculpted in France, circa 1950. This colorful cachepot has a traditional hand painted decor embellished with high relief flowers and leaves in a brown, mauve, beige and pink palette over a dark green background, it is further decorated with a pair of carved snails on each side, and a central handle with top ring. The large ceramic vase is in excellent condition with rich colors, and expressive, realistically sculpted flower petals, it would make a decorative flower vase on a living room buffet or dining room table. Measures: 14.5" W x 8" D x 9.5" H.
