This handsome pair of antique French stools was crafted circa 1880; built in solid walnut, each stool features turned legs joined by shaped stretchers. The warm walnut surfaces display a rich, time-softened patina consistent with age and use, enhancing the stools' authentic antique presence. The seats are upholstered in Aubusson tapestry panels displaying painterly floral and foliate motifs in muted tones of blue, green, ochre, and soft rose. The tapestry shows gentle wear and natural variation, contributing depth and texture without detracting from its decorative appeal. Brass nailhead trim secures the upholstery and provides a subtle decorative accent. Versatile in scale and function, these antique stools are ideal as seating, footstools, or decorative accents at the foot of a bed, beneath a console, or in a living room or library. They are in excellent condition commensurate with age and use. Dimensions: 16"W x 16"D x 19"H
