These elegant antique side tables were created in France, circa 1880. Each occasional table stands on three hand carved spline legs embellished with carved female head medallions at the shoulder and connected with triple tier shelves. The top is dressed with a circular faux marble surface. The tables are in excellent condition with a rich patinated textured finish in the light blue and grey palette, and could also be used as bedside tables or nightstands. Measures: 18.5" diameter 33.5" height.
