Decorate a console or mantel with this elegant pair of carved and giltwood antique urn ornaments from Italy, circa 1850. Each decorative piece features a finely sculpted urn base supporting a stylized floral bouquet in full relief, richly adorned with scrolling acanthus handles and intricate flower details. The carvings retain their original gilded and polychrome finish, revealing warm tones of gold leaf over red and terracotta accents that highlight the craftsmanship of mid-19th-century Italian decorative art. Mounted on stepped wooden plinths for stability and display, the carvings showcase beautifully aged surfaces with a soft, timeworn patina throughout. Their neoclassical composition makes them versatile accents for both traditional and contemporary interiors, ideal for flanking mirrors, entry consoles, or as sculptural tabletop décor. Excellent condition commensurate with age and use, with minor wear adding to their authentic antique character. Measures: 9.75" W x 6.5" D x 27.5" H.
